OLIFF & BERRIDGE, PLC P.O. BOX 19928 ALEXANDRIA, VA 22320				
EXAMINER SEVER, ANDREW T				
ART UNIT		PAPER NUMBER		
2851				

DATE MAILED: 07/14/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

10/798,336

**Applicant(s)**

WADA ET AL.

**Examiner**

Andrew T. Sever

**Art Unit**

2851

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 12 March 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

| 3) <input checked="" type="checkbox"/> Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)<br>Paper No(s)/Mail Date <u>2/2005, 9/2004, 3/2004</u> | 6) <input type="checkbox"/> Other: ____.  |

## DETAILED ACTION

### *Specification*

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Ioka (US 6,558,006).

Ioka teaches in figure 1 an image processing system comprising:

A plurality of image projection means (14 (3a-3d)) for projecting images based on image signals (see figure 3 for how the projection images overlap and the relative placement of each projection means);

Art Unit: 2851

Sensing means (5) for sensing a predetermined image projected by each of the plurality of projection means and generating sensing information (arrow leading to part 16 is information);

Overlap-area detecting means for detecting projection areas

Correction information generating means; and

Projection area correction means

(Compensation data calculator 16 (overlap-area detecting means) takes detected overlap information feeds data to image correcting unit 13 (correction information generating means), which as shown in figure 13 includes shading compensator, geometric compensator and other compensators, image correcting unit then feeds into the projector for projecting the image. (Image correcting unit also partially serves as projection area correction means.))

*With regards to applicant's claim 2:*

Calibration images are generated by test image memory unit and projected by the projectors.

*With regards to applicant's claim 3:*

The method by which Ioka compensates the data is taught in column 7 lines 39-67, includes analyzing individual pixel values.

Art Unit: 2851

*With regards to applicant's claim 4:*

See column 6 lines 5-48 which teaches a geometric (keystone) correction method and column 8 lines 2-65 which teach it with regards to multiple projectors. (See also figures 9a and 9b, which show compensation data or eliminating overlap).

*With regards to applicant's claim 5:*

See column 6 line 50 through column 7 line 67 for color compensation and difference compensations methods.

*In general with regards to applicant's claims 1-5:* All of the above methods are executed by the projector of Ioka and according the parts shown in figure 1 and 3 include means for performing all the claimed methods. (Also see MPEP 2114 and MPEP 2181.)

*With regards to applicant's claim 6:*

As described above the image processing system of Ioka includes a plurality of image projectors (14), sensing section (5), overlap detection section (16), correction information generating section and projection area correction section (13).

*With regards to applicant's claims 7-10:*

See above (communication means is inherent, otherwise the projectors and controllers would not function as specified).

Art Unit: 2851

*With regards to applicant's claim 11:*

Ioka's methods are executed in a computer (see column 3 lines 52-64). As is known computers inherently store methods as programs, which are then executed to cause the hardware to perform a specified function, accordingly, inherently Ioka contains a program(s) to execute the above functions.

*With regards to applicant's claim 12:*

Part 17 is specified as a memory unit, which is a type of information storage medium. (See MPEP 2114.)

*With regards to applicant's claims 13-16:*

The methods of Ioka as described above are detailed in column 4 through column 9.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US 6,480,175 to Schneider teaches in figure 1 a projection apparatus utilizing a plurality of projectors in figures 7a and 7b a method for color matching pixels in overlap areas is described.

This patent could be use to reject several of applicant's claims.

Art Unit: 2851

US 6,814,448 to Ioka teaches in figures 1 and 2 a plurality of projector projection means with image compensation means (in figure 1).

US 6,561,651 to Kubota et al. teaches in figures 2A-4 various plural projection means configurations. Kubota teaches in figures 6 and 7 overlap means.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew T. Sever whose telephone number is 571-272-2128. The examiner can normally be reached on 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on 571-272-2258. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
